

Kelly Doherty confirmed for The Imaging Days 2015

HAARLEM - One of America's most influential people in radio imaging, Kelly Doherty, has been confirmed for The Imaging Days 2015.

She's the Vice President of Imaging at iHeartMedia (formerly Clear Channel), responsible for about 800 radio stations in the United States. Before she was elevated to this position, Doherty was the Imaging Director of one of the world's most well-known radio stations: KIIS FM in Los Angeles. She's also the most widely heard female voice in radio imaging, and can be heard on about 600 radio stations worldwide.

Today's announcement of Kelly Doherty aka 'KellyKellyKelly' should be considered a kickoff to our series of announcements about elite speakers and talent who will perform at The Imaging Days 2015. After the huge success of the first edition, this year the world of radio imaging "becomes one" on the 5th and 6th of October in De Lichtfabriek in Haarlem (the Netherlands).

From today until April 1st, special Early Bird tickets can be ordered at theimagingdays.com. The site will also bring more background information on the event and the speakers in the days and weeks to come.

The Imaging Days 2015 Premium Partners (in alphabetical order):
Beds & Beats, Benztown, Capital of Media, The Radio Imaging Library, Top Format and TRX Music.
